SKILLS SUMMARY

- **Languages:** PHP, Kotlin, JavaScript, TypeScript, Python, Java
- **Back-End:** Laravel, Livewire, NodeJS, ExpressJS, NextJS
- **Front-End:** ReactJS, TailwindCSS
- **Databases:** MySQL, MongoDB
- **Cloud Services:** Firebase, Appwrite
- **Tools:** Git/GitHub, Postman, Linux

EXPERIENCE

D IT Solutions Pvt. Ltd.

Mangalore, India

Junior Full Stack Engineer

June 2025 – May 2026

- Developed booking, scheduling, and service management features for customer-facing laravel web applications.
- Contributed to financial and billing-related modules, including automated invoice generation and workflow enhancements.
- Developed template-based WhatsApp, Telegram, and email notification workflows with authentication, session management, and automated message delivery.
- Implemented queue-driven message processing for reliable and asynchronous message delivery.
- Built real-time notification features using Laravel Reverb for platform updates and alert delivery.

Junior Web Alchemist Intern

Feb 2025 – May 2025

- Appointed as lead intern to manage a 4-member team in engineering an uptime monitoring platform from scratch using laravel.
- Developed DNS monitoring functionality and contributed to automated monitoring job workflows.
- Built dashboard analytics and visualizations for monitoring metrics and incident tracking.
- Integrated Cashfree Payment Gateway to support subscription and payment workflows.
- Implemented role-based access control using Spatie Laravel Permission.
- Enhanced authentication security by integrating Google reCAPTCHA into the login workflow.

PROJECTS

PhoneRover - 4G Teleoperation RC Car

Tech: Android (Kotlin), Arduino (C++), WebRTC, Node.js, Coturn, GCP Compute Engine

- Developed the software and control infrastructure for a remotely controllable RC rover with an Android smartphone serving as the onboard processing and 4G video streaming hub.
- Implemented low-latency WebRTC communication using a custom Node.js signaling server and Coturn TURN relay, deployed on Google Compute Engine (GCE) for connectivity across cellular networks.
- Integrated the Android application with an Arduino Nano via USB-OTG serial to transmit and execute real-time motor and steering control commands.

TeXpert - AI-Powered LaTeX PDF Generator

Tech: Next.js, TypeScript, Gemini API, Firebase, Docker, LaTeX

- Developed an AI-powered document generation platform, submitted to the Gemini API Developer Competition, that converts natural language prompts into professionally formatted LaTeX PDFs.
- Implemented iterative document refinement, image embedding, custom font support, and a backend LaTeX compilation pipeline for automated PDF generation.
- Designed a containerized deployment workflow using Docker and integrated Firebase for authentication, storage, and database management.

StreeRaksha - Violence Detection System

Tech: Python, Ultralytics YOLO, Keras (CNN), OpenCV, Socket.IO, HTML, JavaScript

- Developed a real-time threat detection system utilizing Ultralytics YOLO models to identify physical violence, weapons, and individuals in video feeds.
- Implemented a demographic tracking pipeline by extracting person bounding boxes using YOLO11s and performing gender classification with a custom Keras CNN trained on the PETA dataset.
- Built a live monitoring dashboard using Socket.IO to stream video frames and detection metrics, including violence alerts, weapon detections, and male/female counts.

EDUCATION

Canara Engineering College

Bachelor of Engineering - Computer Science and Design; CGPA: 8.26

Mangalore, Karnataka

December 2021 - August 2025

CERTIFICATIONS

- **Front End Development Libraries** by freeCodeCamp
- **Back End Development and APIs** by freeCodeCamp
